

Safeguarding Meredith's Waters

A Community Forum on Cyanobacteria

Join us for a public forum on protecting our lakes and raising awareness about cyanobacteria. The evening will feature a presentation by Laura Diemer of FB Environmental on the Waukegan Cyanobacteria Monitoring Project, followed by a panel discussion with representatives from UNH, NHDES, and local partners.

Local organizations will have display tables with educational materials and ways to get involved. Learn how we can all play a role in protecting our lakes.

Wednesday
June 18, 2025
6:00 PM- 7:30 PM
Meredith Community Center
1 Circle Dr, Meredith, NH
